

<b>Dataset Title</b>	Northern Territory SA1 Boundaries vs Elector Numbers
<b>Agency</b>	Northern Territory Electoral Commission
<b>Division</b>	
<b>Dataset Description</b>	Northern Territory elector numbers as at 15 February 2019 against Australian Statistical Geography Standard (ASGS) Statistical Area 1 (SA1) indexes and NT Legislative Assembly (LA) division names. In the instance where as SA1 is divided between two or more LA divisions, the SA1 index will appear on multiple rows in the file. An individual row in the file will represent elector numbers for a whole or partial SA1 as it relates to any given LA division boundary. Members of Legislative Assembly that reside outside their electoral division are represented at the beginning of the file against factitious SA1 IDs. Specifically '7019999', '7029999'.
<b>Dataset Classification</b>	High

<b>Dataset quality rating</b>	<b>Accuracy</b>	★★★★
	<b>Completeness</b>	★★★
	<b>Consistency</b>	★★★★★
	<b>Timeliness</b>	★★★
	<b>Integrity</b>	★★★★★

<b>Accuracy</b>	<b>High</b>	★★★★
-----------------	-------------	------

- X The data correctly represents what it was designed to measure, monitor or report
- ✓ This data meets quality assurance processes (checking of errors at each stage of the data collection and processing)
- ✓ Action has been taken to minimise processing errors
- ✓ Information on any known limitations of the data collection is provided.
- ✓ Data fits certain criteria and adheres to specific business rules.

<b>Completeness</b>	<b>Reasonable</b>	★★★
---------------------	-------------------	-----

- X Dataset contains all the records expected and are correctly populated
- ✓ Data completeness is measured at the dataset, record, or column level
- ✓ Data with missing values were identified and addressed
- X The proportion of data stored against the potential of 100% complete
- ✓ Data completeness was checked against mandatory attributes that require a value

<b>Consistency</b>	<b>High</b>	★★★★★
--------------------	-------------	-------

- ✓ Data values were consistently represented within a dataset, between datasets and across datasets
- ✓ No differences were found when comparing two or more representations of an entity against a definition
- ✓ Data within the database conforms to defined business rules
- ✓ Data meets rules for content and format enabling effective matching and consistent output
- ✓ Only valid data will be written to the database

<b>Timeliness</b>	<b>Reasonable</b>	★★★
-------------------	-------------------	-----

- X Data is available quickly and frequently enough to support information needs
- ✓ Time lag between the reference period and the actual date of release is short
- ✓ The frequency of the data collection is specified (one-off basis or ongoing)
- ✓ Data is current and released before it is superseded
- X Updates or revisions to the data are made after its release

<b>Integrity</b>	<b>High</b>	★★★★★
------------------	-------------	-------

- ✓ Standard definitions, common concepts, classifications and data recording practices have been used
- ✓ Elements within the data can be meaningfully compared
- ✓ This data is generally consistent with similar or related data sources to enable data compilation and comparison
- ✓ This data is consistent with previous releases (no significant changes to methodology or collection standards)

- ✓ There were no major changes in the way data items are defined, classified or counted since the start of the series

### Additional information on criteria not met - data marked with a X

#### Accuracy

Members of Legislative Assembly that reside outside their electoral division are represented at the beginning of the file against factitious SA1 IDs. Specifically '7019999', '7029999'.

#### Completeness

This data set excludes provisional electors who were younger than 18 years old as at the date of recording.  
Some SA1 indexes are not present where no electors reside in that SA1.

#### Timeliness

This dataset is only produced for the NT Electoral Boundary Redistribution process. Currently, this occurs once every 4 years.  
An update or revision of this data is possible if required for the redistribution process.
